

These are approximate guidelines only. Teeth don't always move in predictable ways. A number of factors (*including anatomy and patient compliance*) can significantly affect the duration and effectiveness of treatment. Even cases within our recommended parameters cannot always be treated successfully.

There are no guarantees in clear aligner therapy. Some cases may require more than the allotted number of aligners. When you evaluate the difficulty of a case, always consider the whole mouth and all treatment goals.

	EASY 2-6 months
	ADVANCED 6-12 months
	ORTHODONTIST 12-24 months

Crowding Per arch

Spacing Per arch

Overjet Total (both arches)

Midline misalignment Total (both arches)

Overbite Total (both arches)

Open bite Total (both arches)
